## **BUT IN THIS MOMENT MILLIONS MORE ARE STILL COUNTING ON YOU.**

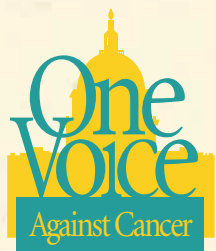

---

Congress, thank you for helping 13.7 million Americans get the most out of life. They're living beyond cancer due to federally funded research breakthroughs. But your job isn't done.

The more than 200 diseases that we call cancer take a tremendous toll on our nation. It is estimated that almost 1.7 million people in the U.S. will be diagnosed with cancer this year. Cancer touches every American in some way – 1 in 2 men and 1 in 3 women will contract the disease in their lifetime.

One Voice Against Cancer represents more than 45 organizations working together to increase funding for cancer detection, prevention and treatment. With adequate funding, approximately half of all cancer deaths could be avoided by simply using the knowledge and tools already available. Tens of thousands of men and women would have access to colorectal screenings. And a half-million women could be screened for breast and cervical cancer.

Join us: increase funding for the National Cancer Institute and National Institutes of Health, and help more Americans get the most out of life.
