

June 2, 2011

The Honorable Harold Rogers  
Chairman, Appropriations Committee  
U.S. House of Representatives  
Washington, DC 20515

The Honorable Norman Dicks  
Ranking Member, Appropriations Committee  
U.S. House of Representatives  
Washington, DC 20515

The Honorable Denny Rehberg  
Chairman  
Labor - HHS - Education Subcommittee  
U.S. House of Representatives  
Washington, DC 20515

The Honorable Rosa DeLauro  
Ranking Member  
Labor - HHS - Education Subcommittee  
U.S. House of Representatives  
Washington, DC 20515

Dear Chairman Rogers, Rep. Dicks, Chairman Rehberg and Rep. DeLauro:

As members of One Voice Against Cancer (OVAC), a coalition of public interest groups representing the millions of cancer researchers, patients, survivors and their families throughout the nation, we urge you to maintain essential appropriations support for cancer prevention and control programs at the Centers for Disease Control and Prevention (CDC).

### **CDC Cancer Programs - Front Line Defender Against Cancer Death and Cost**

Collectively, the CDC cancer programs are the cornerstone of our country's cancer prevention efforts. Cancer takes the lives of 1,500 Americans each day. CDC prevention programs are a key element of national efforts that can reduce that toll. Cuts to these programs will hinder the progress made during the past few years in reducing both cancer incidence and mortality. The fiscal year 2011 budget presented many challenges and led to a \$740 million cut to the CDC, and we recognize that you have another difficult task in balancing priorities for fiscal year 2012. However, we ask that you not further cut funding for cancer programs that have a proven record of success for early detection, prevention, education, awareness, and data collection.

### **To Be Effective CDC Cancer Programs Must Remain *Separate***

We also ask that you maintain all the cancer prevention as a distinct separate program within the Division of Cancer Prevention and Control, and they not be included as part of any broader consolidation. This must be done to ensure cancer prevention efforts are not diluted. The President's proposal to merge all chronic disease programs within one grant program would severely reduce the success cancer prevention and control programs at CDC. It would obscure the urgency of cancer prevention and decrease efficiency among the cancer programs.

901 E Ste. NW, Ste. 500 · Washington, D.C. 20004 · (202) 661-5700 · ovaonline.org

## **CDC Cancer Prevention Programs – A Top Weapon for Fighting Cancer**

Sixty percent of cancer deaths today could be prevented by simply doing what we already know. Any further cuts or attempts to consolidate the cancer programs would result in fewer people having access to proven evidence-based educational materials and screening programs. Programs such as the National Breast and Cervical Cancer Early Detection Program and the Colorectal Cancer Control Program increase access and improve the quality of breast and cervical, colorectal cancer screening nationwide. State breast and cervical cancer programs alone have saved thousands of lives by giving low-income and uninsured individuals access to the care they need to continue living health lives.

## **CDC Cancer Statistics - Essential Element of National Cancer Program**

The National Program of Cancer Registries serves as the foundation for surveillance of cancer incidence and mortality across the country. Data collected under this program helps public health professionals at every level of government determine and monitor cancer trends, prioritize resources and advance research.

## **CDC Cancer Education and Outreach - Cost Effective Cancer Control**

Lastly, CDC funding for nationwide outreach and education programs is also critical to our cancer prevention efforts. This funding supports public awareness campaigns, the development of culturally appropriate materials, as well as educational resources on a range of topics for gynecologic, ovarian, blood, skin and prostate cancer.

As you develop a FY 2012 Labor-HHS appropriations bill, **we ask that the CDC cancer programs be funded at least at their FY 2010 levels.**

The members of OVAC thank you for your consideration of this request and stand ready to support your efforts on behalf of these programs.

Sincerely,
